PROFESSIONAL SUMMARY

Data Science student at Alexandria University with hands-on experience in Python, data cleaning, exploratory data analysis, statistical analysis, data visualization, and business intelligence. Experienced in analyzing transactional datasets and translating raw data into meaningful insights. Developing practical machine learning capabilities through the DEPI Data Science Track, with strong interest in applied ML, predictive modelling, optimization, and reliable data-driven solutions.

EDUCATION

B.Sc. in Data Science — Alexandria University, Faculty of Computers and Data Science
Expected Graduation: 2028

EXPERIENCE

Data Science Trainee — Digital Egypt Pioneers Initiative (DEPI), 2026

- Developed practical data analysis, data science, and machine learning skills through hands-on training and applied projects.
- Used Python and analytical techniques to clean, explore, analyze, and visualize datasets.
- Strengthened problem-solving and data-driven decision-making through practical projects.

Data Analysis Intern — TechTrek, 2026

- Applied data analysis and visualization techniques to explore datasets and communicate analytical findings.
- Supported insight generation using data-cleaning workflows and analytical tools.

SELECTED PROJECTS

E-Commerce Order Analytics

- Analyzed 7,000 orders across 36 columns covering January 2025 to June 2026.
- Performed data cleaning and exploratory analysis to identify patterns in revenue, orders, ratings, seasons, branches, products, and brands.
- Created business-focused visualizations to translate analysis into meaningful insights.

Uber Analytics Dashboard — Power BI

- Built an interactive dashboard analyzing trips, revenue, vehicle types, pickup/drop-off locations, ratings, and cancellation performance.
- Developed DAX measures and interactive filters to support analytical decision-making.

Supermarket Data Analysis — R

- Analyzed supermarket data using R and visualization techniques to identify patterns and trends.
- Applied statistical methods to translate data into actionable business insights.

TECHNICAL SKILLS

Programming	Python, R, SQL (developing)
Data Science	Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis, Data Visualization
Machine Learning	Machine Learning fundamentals, model development fundamentals, model evaluation
BI & Visualization	Power BI, DAX, Excel, Dashboard Development
Cloud	AWS Cloud Foundations, AWS Core Services, Cloud Security Fundamentals

PROGRAMS & CERTIFICATIONS

- DEPI Data Science Track — Powered by IBM
- AWS Academy Graduate — Cloud Foundations (2026)

YASSIR ROLE ALIGNMENT

- Strong foundation in exploratory analysis, statistical reasoning, visualization, and analytical problem solving.
- Experience working with transactional data and identifying patterns across operational and business dimensions.
- Developing machine learning capabilities with a focus on applied predictive modelling and optimization.
- Able to communicate analytical findings through dashboards and business-focused visualizations.
- Strong interest in real-world ML applications including pricing, demand, optimization, and intelligent digital products.
